

Silvertone Bass Model 1443

2x lipstick PUs - in series

Original, stock wiring, except where indicated.
PU leads were both black, w/ neg. knotted. Bare shield.
However, knotting errors were -often- made on the RWRP PUs. If volume is weak on the "middle/both" switch position, swap the +/- leads on one of the pick-ups.
Pots viewed from back.
Mullard fish cap @ 0.22uf is correct.

Bridge ground wire not original.
Component ground was originally foil tape strip on back of pickguard.
